

SATSANG EXPERIENCE PLATFORM — WIREFRAME

Core Concept

A structured, reality-grounded digital experience of Satsang:

- Truth (Sat)
 - Association (Sang)
 - Collective realization (not individual hero journey)
-

PAGE STRUCTURE

1. HERO SECTION (Landing)

Layout: Full width, minimal design

Content:

- Title: "Satsang: Experiencing Truth Together"
 - Subtitle: "From listening → understanding → alignment"
 - CTA Button: "Enter Satsang"
-

HERO IMAGE GENERATION SET (Action 1)

Objective: Generate 2–3 options for selection (same subject continuity across project)

Option A — "Arrival in Stillness"

Prompt: A small group of people walking quietly toward a simple satsang space at sunrise, natural light, no grandeur, barefoot or simple clothing, earthy tones, trees around, soft golden morning light, calm atmosphere, realistic photography style, minimal composition, human-centered, cinematic but grounded

Option B — "Silence Before Words"

Prompt: A group of diverse people sitting in a simple circle in silence, eyes gently closed or lowered, no guru dominance, equal presence, soft diya lamps, warm low lighting, natural textures, peaceful but real expressions, no glow effects, highly realistic, documentary style

Option C — "Threshold Moment"

Prompt: A single person standing at the entrance of a satsang hall or under a tree gathering, hesitating before entering, others already seated inside calmly, contrast between outside world and inner stillness, warm natural lighting, grounded realism, emotional but subtle

SELECTION CRITERIA

- Must feel **real, not idealized**
 - No heavy glow or fantasy
 - Human presence > symbolism
 - Works as long-term identity visual
-

USAGE

- Select 1 primary hero image
 - Keep 2 alternates for theme switching/testing
 - Maintain same character continuity for future frames
-
-

2. STORYBOARD SCROLL ENGINE (Core)

Layout: Split screen

- Left: Visual frame
- Right: Verse + meaning + application

Frame Structure:

- Phase title
- Sanskrit verse
- Transliteration
- Meaning (simple)
- Practical insight

Scroll Flow:

PHASE 1 — ARRIVAL

- People entering satsang
- Silence
- First verse listening

PHASE 2 — ALIGNMENT

- Reflection
- Listening
- Subtle awareness

PHASE 3 — COLLECTIVE FIELD

- Group chanting
- Breath sync
- Natural rhythm (wind, light)

PHASE 4 — EXPANSION

- Multiple satsang groups
- Earth-level awareness

PHASE 5 — NIRVANA

- No identity
 - Pure presence
-

3. “DANCE OF GOD” SECTION

Purpose: Reframe divinity as reality in motion

Layout: Full width visual + overlay text

Content:

- Nature loops (wind, water, breath)
 - Text: "When alignment happens, reality itself moves in rhythm."
-

4. VERSE LIBRARY MODULE (Interactive)

Features:

- Select Grantha
- Filter by category
- Add new verse

Categories:

- Atman (Self)
- Karma (Action)
- Bhakti (Devotion)
- Jnana (Knowledge)
- Advaita (Unity)
- Satsang (Association)

Verse Card:

- Sanskrit
- Transliteration
- Meaning

- Tag (phase mapping)
-

5. ADD VERSE FEATURE (User Input)

Form Fields:

- Grantha name
- Verse (Sanskrit)
- Transliteration
- Meaning
- Category
- Suggested storyboard phase

Action:

- Submit → stored in database → appears in library
-

6. SATSANG MAP (Future Expansion)

Layout: World map

Content:

- Markers for satsang groups
 - Click → details (time, theme, verses used)
-

7. BACKGROUND PHILOSOPHY SECTION

Heading: "What is Satsang?"

Content:

Satsang is not:

- Performance
- Escapism
- Visual spectacle

Satsang is:

- Listening to truth
 - Reflecting deeply
 - Living in alignment
-

8. EXPERIENCE MODES (Optional)

- 🎬 Visual Story Mode
 - 🎵 Chant + Verse Mode
 - 🧘 Guided Reflection Mode
-

DESIGN SYSTEM

Colors:

- Earth brown
- Soft gold (minimal)
- Deep blue (night reflection)

Typography:

- Clean serif for verses
- Sans-serif for UI

Visual Style:

- Realistic
 - Minimal glow
 - Human-centered
-

TECH STRUCTURE

Frontend:

- React / Next.js

Data:

- JSON / database for verses

Animation:

- Framer Motion (subtle only)
-

NEXT STEP OPTIONS

1. Convert this into working React code
2. Design UI mock (Figma-style layout)

IMPLEMENTATION ROADMAP (Living Satsang Platform)

PHASE 1 — FOUNDATION (Weeks 1-2)

- Setup Next.js project
- Build static page sections (Hero, Storyboard, Philosophy)
- Add 5-10 curated verses manually
- Implement basic scroll storytelling

Goal: Functional prototype (no user input yet)

PHASE 2 — VERSE SYSTEM (Weeks 3-4)

- Create verse database (JSON → later DB)
- Build Verse Library UI
- Implement filters (category, grantha)
- Connect verses to storyboard phases

Goal: Structured knowledge layer

PHASE 3 — USER CONTRIBUTION (Weeks 5-6)

- Add "Submit Verse" feature
- Moderation layer (important for authenticity)
- Store user submissions

Goal: Platform becomes participative (controlled satsang growth)

PHASE 4 — EXPERIENCE LAYER (Weeks 7-8)

- Add modes:
- Visual Story Mode
- Chant Mode
- Reflection Mode
- Subtle animations (Framer Motion)

Goal: Multi-dimensional engagement

PHASE 5 — SATSANG NETWORK (Future)

- Global satsang map
- Real-world group integration
- Event scheduling

Goal: Bridge digital → real satsang

GOVERNANCE (Critical for Authenticity)

To maintain "true satsang":

- No random content publishing
- Verse validation required
- Avoid dilution into social media style

Roles:

- Curator (verifies verses)
 - Contributor (adds content)
 - Viewer (consumes experience)
-

CONTINUOUS EVOLUTION MODEL

Loop: 1. Verse added 2. Mapped to phase 3. Visual/story updated 4. Experience refined

→ Platform grows as a **living knowledge field**

FINAL END GOAL

A **Living Satsang Platform** where:

- Truth is explored collectively
 - Verses guide experience
 - Visuals support (not dominate)
 - Users evolve from observers → participants → contributors
-

End Goal (Refined): A disciplined, evolving satsang ecosystem integrating knowledge, experience, and collective awareness.

N1 ORDER FOUNDATION — VERSE VALUE MAPPING

Anchor Verse for Baseline

"Namāmi śamīśāna nirvāṇa rūpam" (Source: Shiva Mahimna Stotram)

1 Literal Meaning Layer

- "Namāmi" → I bow / I align with
- "Śamīśāna" → The supreme controller / transcendent principle
- "Nirvāṇa Rūpam" → The form of liberation / formless state

2 Functional Meaning (System Interpretation)

This verse represents:

- Final state of realization
- Formless awareness
- Identity dissolution
- System endpoint (no further expansion beyond this state)

3 Value Mapping for Platform

Element	Platform Meaning
Nirvāṇa	Terminal layer (N4)
Rūpam	Representation of formless state in system
Namāmi	User alignment with truth
Śamīśāna	Ultimate governing principle of order

4 N1 Structural Role

This verse creates:

- Baseline of transcendence
- Order marker
- Final reference state
- Stability anchor for consecutive verse flow

5 Maintenance Rule Derived

- All verse sequences (N1) must progress toward clarity
- No random insertion beyond structured flow
- Nirvāṇa verse remains terminal reference

Result: This verse functions as the philosophical backbone for maintaining disciplined satsang architecture and systematic grantha alignment.
